

CORRUPAD PRODUCTS®

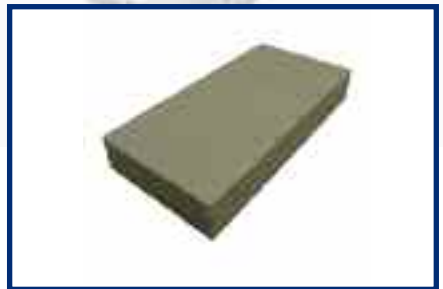

Multi-Wall Packaging announces their latest “Protective Packaging Solution”, Corrupad®. Corrupad® is custom corrugated packaging made of 100% recyclable paper which has superior cushioning and stacking strength properties. Using a patented manufacturing process, single face corrugated is formed into angles, channels or flat pads. This proprietary process gives the pads strength, resilience and shock absorbency, using less materials than polystyrene and foams. Corrupad’s wide range of performance characteristics combined with easy fabrication makes it an optimal resource for inexpensive yet effective packaging.

Features and Benefits:

- Superior, cost-effective packaging
- Excellent cushioning properties
- High stacking strength
- Made of 100% recyclable paper
- S/N # 74181735

Whether you need packaging for appliances, electronics, medical equipment, automotive, office furniture and equipment or computers, Corrupad can be designed to protect products of virtually any size and weight.
