

SINGLE FACE FROM MULTI-WALL

What is single face?

Single Face corrugated paper is an economical protective packaging material used for both cushioning and wrapping applications. Manufactured from recycled corrugated material, **Single Face** is an environmentally friendly alternative to packaging films and foams.

Applications

Typical industrial applications for **Single Face** include:

- Wire spool wrap
- Millwork wrap
- Sheet glass separators
- Glass and bottle wrap
- Metal roll and cylinder protection
- Protective floor liner
- Rail car floor liner

Available sizes, strengths, widths and lengths

Single Face is available in two flute sizes, A flute (3/16") and B flute (1/8").

Single Face is manufactured in several standard strengths: G.P. (general purpose), 26/26, 33/26, 42/26.

All grades are available in widths from 3" to 72".

Sheet size from 2" wide to 72" and 12" to 84" in length.
