

U-CHANNELS FROM MULTI-WALL

Construction

Multi-Wall **U Channels** are pre-formed protective pads constructed of laminated piles of 3/16" A flute single face corrugated paper. These pads are designed to various lengths and thicknesses to meet or exceed National Motor Freight Specifications.

Applications

Typical uses for **U Channels** are protection for:

- Mirrors
- Headboards
- Office partitions
- Table tops
- Picture frames
- Rocking chair legs
- Glass fireplace doors
- Any flat surfaces that need protection on top and bottom edges.

Available liners, widths, lengths, and wall thicknesses

The need for foam or polyethylene wrapping, and labor to apply them to your product, can often be eliminated when **U Channels** are ordered with our non-abrasive liners. **U Channels** are available with standard corrugated liner or with optional non-abrasive linings: Michelman coating, MULTI-SOFT® tissue, or microfoam.

U Channels are available in groove widths from 3/4" to 5".

Pad lengths are available from 6" to 150".

Wall thickness are available from 3/8" to 3/4".
